### **TRAFFIC SIGNAL IMPROVEMENT AT CLASSEN BOULEVARD AND CONSTITUTION STREET**

On Wednesday, December 17, 2014, Traffic Signals, Inc. will be working at the Classen Boulevard intersection with Constitution Street. After 9:00 a.m. on December 17<sup>th</sup>, the intersection may be temporarily controlled by an all-way STOP sign. Full signal operation should be restored at the intersection by 12:00 p.m. on the same day. The work to be done involves switching the eastbound signal heads onto the new pole and upright and to modify the westbound signal heads in accordance with the plans developed for the Aspen Heights project. It also involves relocation of an existing video detection camera and wiring the new signal head locations into the cabinet. The modifications are necessary to be able to accommodate the roadway changes for the proposed development project. Due to the nature of the work, lane closures may be necessary on portions of Constitution Street as the contractor works overhead. Traffic control will be provided by Traffic Signals, Inc. to guide motorists safely through this work zone.

Any questions about the project can be directed to Mr. David Riesland, City of Norman Traffic Engineer, at (405) 329-0528 or [David.Riesland@NormanOK.gov](mailto:David.Riesland@NormanOK.gov).
